Your approved client

Connect / authorize

**30-second heartbeat**

### 1 Set up once

Choose folders
Authorize your DNS zone
Create a stable hostname

A local bilingual control panel

### 2 Approve access

Add the HTTPS /mcp URL
Select OAuth in ChatGPT
Approve on your own domain

Credentials stored locally

### 3 Recover quietly

Check both transport paths
Switch routes and recover
Resume after Windows sign-in

Startup grace + retry cooldowns
